

Corrosion Service was founded in 1950 by Thomas R.B. Watson as the first Canadian firm to specialize in cathodic protection. Our founding philosophy was based on the principles of providing great customer service and developing a deep understanding of customer needs, these same core principles still guide our company today.

Throughout our history we have always been privately owned by successive groups of employees that have risen through the organization. This ownership structure gives us a unique perspective on business and ensures that our stakeholders (customers, employees and partners), rather than shareholders, always come first. This is vital for a company such as ours, given that we exist primarily to protect the environment, our citizens and the prosperity of the communities in which we live. This position is in our Markham location.

Position: Corrosion Technician, TEO

The successful candidate would be part of the TEO group and would participate in the field inspection, installation, service, repair, and troubleshooting of cathodic protection systems. The candidate shall report to the Jr. Team Lead of TEO.

Duties of the Corrosion Technician may include but not limited to:

- Field projects are to be completed in an efficient and timely manner.
- LMRAs to be completed for each job and VSI daily, both to be submitted weekly to Project Coordinator.
- Data analysis and technical report writing must follow immediately after field activities back in the office.
- Work with management and other designated personnel for various assigned projects.
- Responsible for profitable delivery of Corrosion Service products and services.
- Develop the culture of employee's attitudes toward work and each other.
- University from an electrical/electronic engineering or technology program.
- To follow the company policies and procedures; to suggest any changes to current policies and procedures that would result in improved performance; to maintain a professional business-like attitude to work well with colleagues, customers, and suppliers.
- Complete current week time sheets for submittal to your supervisor for approval no later than 12pm the following Monday.

Qualifications:

- University from an electrical/electronic engineering or technology program.
- NACE CP Certification would be preferred.
- Prior work experience in a field support type role.
- The candidate should have solid hands-on technical capabilities, valid driver's license, be willing to travel and work overtime.
- Candidates must have good oral, written communication, and computer skills.
- Experience with cathodic protection and/or the Oil/Gas industry would be considered an asset.
- Candidates must have exceptional organizational, analytical, and communication skills and be proficient at Microsoft Office Suite and Microsoft Project (or equivalent).

We are an organization where you can apply your skills to some of the world's most challenging, and interesting projects nationwide. It is a place that values the diversity of our areas of practice and our people. It's what makes Corrosion Service a great place to work and grow. Corrosion Service is an Equal Opportunity Employer. If you would like to work in a stimulating environment with the prospect of developing your potential, we invite you to explore the possibility of joining our team.
