

Corrosion Service was founded in 1950 by Thomas R.B. Watson as the first Canadian firm to specialize in cathodic protection. Our founding philosophy was based on the principles of providing great customer service and developing a deep understanding of customer needs, these same core principles still guide our company today.

Throughout our history we have always been privately owned by successive groups of employees that have risen through the organization. This ownership structure gives us a unique perspective on business and ensures that our stakeholders (customers, employees and partners), rather than shareholders, always come first. This is vital for a company such as ours, given that we exist primarily to protect the environment, our citizens and the prosperity of the communities in which we live.

## **Position: Junior Team Lead, Mobile Operations**

### **GENERAL FUNCTION:**

The successful candidate would be part of the 'Mobile Operations' group and participate in the field inspection, installation, service, design, repair and troubleshooting of cathodic protection systems. This position is based in Markham.

### **RESPONSIBILITIES:**

- This position is responsible for leading a project team of field technicians in the execution of their day to day duties on select projects. The Junior Team leader is responsible for the overall development, coordination, the field management and leadership of their Team.
- Responsible for the maintenance and operational function of the Project Team as well as their tools and equipment.
- Responsible to coordinate and complete the specific Project Team task objectives.
- Responsible for the in-field training and development of the Project Team members.
- Responsible for generating project specific safety documents (JSA, HASP, ERP, etc.)
- Ensuring staff meet project requirements for technical, safety, processes, etc.
- Assist with arranging and organizing site orientations for projects, when required.
- May need to travel on short notice to support field staff
- Work with Project Management on field schedules and project scopes
- Assist in maintaining equipment functionality and calibrations
- Ensure Project Teams have necessary equipment onsite at start of shift
- Assist SUP in tracking equipment location and responsible staff when allocated
- Assist with selecting and interviewing new field staff candidates
- Responsible for approving timesheets and expenses for Team
- Complete current week time sheets for submittal to your supervisor for approval no later than 12pm the following Monday.

This role is approximately 80% office and 20% field.

### **QUALIFICATIONS:**

- Applicants should be enrolled in a university or college program within an electrical/electronics engineering or technology discipline.
- Prior work experience in a field support type role would be an asset.
- Individuals with NACE CP Certification would be preferred.
