

Corrosion Service was founded in 1950 by Thomas R.B. Watson as the first Canadian firm to specialize in cathodic protection. Our founding philosophy was based on the principles of providing great customer service and developing a deep understanding of customer needs, these same core principles still guide our company today.

Throughout our history we have always been privately owned by successive groups of employees that have risen through the organization. This ownership structure gives us a unique perspective on business and ensures that our stakeholders (customers, employees and partners), rather than shareholders, always come first. This is vital for a company such as ours, given that we exist primarily to protect the environment, our citizens and the prosperity of the communities in which we live. This full-time position is based from the Markham, ON office and requires travel throughout the province.

Position: Jr. Team Lead, Overline Surveys

GENERAL FUNCTION:

The successful candidate would be part of the Ontario Operations group and would primarily lead overline surveys, but would also participate in other field inspections, installations, service, repairs, and troubleshooting of cathodic protection systems.

To achieve this objective, the Jr. Team Lead, Overline Surveys' primary responsibilities are:

RESPONSIBILITIES:

- Leading a project team of field technicians in the execution of their day to day duties on select projects. The role is responsible for the overall development, coordination, the field management and leadership of their Team.
- Maintenance/operational function of the team as well as their tools / equipment.
- Coordinate and complete the specific Project Team task objectives.
- Infield training and development of the Project Team members.
- Generate project specific safety documents (JSA, HASP, ERP, etc.)
- Ensuring staff meet project requirements for technical, safety, processes, etc.
- Assist with arranging / organizing site orientations for projects, when required.
- Will need to travel on short notice to support field staff.
- Run and oversee multiple survey crews as required.
- Work with Project Management on field schedules and project scopes.

GENERAL:

- To follow the company policies and procedures
- To suggest any changes to current policies and procedures that would result in improved performance
- To maintain a professional attitude
- To work well with colleagues, customers, and suppliers
- To be a contributor to safety meetings
- Follow branch assigned hours of work requirements

QUALIFICATIONS:

- University or college graduates from an electrical/electronics engineering or technology program.
- Prior work experience in a field support type role would be an asset.
- Individuals with NACE CP Certification would be preferred.
- Must have good oral, written communication, and computer skills.
- Must be physically fit, willing to routinely work outdoors, and able to lift 30kg on a regular basis.
- Solid hands-on technical capabilities, valid driver's license, be willing to travel, and work overtime.
- General understanding of electrical circuits and theory.
- Good initiative, adaptable, flexible, and team player.
- Technical (electrical) background, good problem solving skills.
- Any cathodic protection background will be an asset.
- Experience in the oil and gas pipeline industry is valuable.

We are an organization where you can apply your skills to some of the world's most challenging and interesting projects nationwide. It is a place that values the diversity of our areas of practice and our people. It's what makes Corrosion Service a great place to work and grow. Corrosion Service is an Equal Opportunity Employer. If you would like to work in a stimulating environment with the prospect of developing your potential, we invite you to explore the possibility of joining our team.

Note: All employment is conditional upon the completing and obtaining a satisfactory background check, including employment, references and criminal records (for which a pardon has not been granted) checks. You must be able to pass a pre-employment drug and alcohol screening test, including having abstained from THC-based marijuana and related products for at least 21 to 28 days prior to starting at the company – 100% CBD products are permissible.

Please note that only individual selected for an interview will be contacted.
